Insane.

Back of envelope math: let's say this is ~8 million mints (assuming 50TPS sustained for 2 days)

Roughly speaking: Ethereum has recently processed ~8m txs / week. Yet, this is ONE app on ONE StarkEx instance, getting to the same number of transactions in 2 days. Bullish!

40-60 TPS over past 2 days on @StarkWareLtd's StarkEx, minting NFTs for @Immutable .

Probably nothing.
