When the squeeze finally happens, he's gonna be a in the history books. Think about this for a second. I'm sure a few millionaires and billionaires saw Superstonk or WSB a year ago and knew there was a revolution forming in the commonwealth, but most probably wrote off the huge upside because trying to take down the financial institutions of America would most likely end with who has the best lawyer and who has the most time/ money. Nothing really in it for us. He's pioneering crypto to do what everyone was ready to write it for not being able to do, which is overtake fundamental banks and let the people be their own bank. Once Bitcoin capped out around 70k(?) nobody really knew what would happen from there because they'd either have to be integrated to regular finance or take over the banking industry entirely. He could be the figurehead for making the latter happen. GameStop could potentially be the top NFT/ crypto platform at the forefront of an entirely new society. That's where Goldman Sachs and companies alike are getting their trillion dollar valuations for NFTs. This man is next level intelligent for the things he's been able to do thus far. He'll be a name that sticks around long after this.
