Has anyone else experienced difficulty DRSing my GME shares from Revolut to Computershare? Did one batch in December and the other in February and had no issue. I followed the exact same method I used last time, sending an email to their support with a completed PDF form requesting my shares to be transferred.

Both previous times I had a reply within 24 hours that my transfer was underway. However last week I requested a transfer of 11 shares and I haven't received a reply. I made another request yesterday morning and still awaiting a reply.
