GameStop

At 100\$ a share

500mill shares to cover

It costs them 50 Billion\$.

But nobody's selling only buying, so they create more fake shares and now there are more shares to buy back for them to cover.

At 500\$ a share it's 500 times 500 mill shares= 250 billion \$ to cover.

At 1000\$ a share it's 500 Billion \$ to cover.

At 10,000\$ a share it's going to be 5 Trillion \$ to cover!

How the fuck!!

What is their plan, I wonder?

Any apish thoughts?
