There are 365 days in a year

And about 252 of those days are Days that you can trade

We've been HODL'ing for over a Year.

In the future 1/252 days will be the Squeeze of GME.

Now on average every day we have a 0.396825397% chance of the squeeze happening...

There may be a catalyst that comes along that improves those odds, but until then and if my math is correct.....

Tomorrow at 2PM is the Day... ■■■
