Hey folks! I will provide daily updates on the statistical significance of the drop in GME Dark Pool % since Sept 15th (original analysis here: [https://www.reddit.com/r/DDintoGME/comments/pv07y7/recent_dark_pool_is_statistically_significant/])(https://www.reddit.com/r/DDintoGME/comments/pv07y7/recent_dark_pool_is_statistically_significant/))

TLDR: DRS Still Fucks

Since we now have 9 trading days since Sept 15th, I'm now comparing the 9-day rolling average vs. the 30-day/60-day rolling average. In both cases, the recent drop is still statistically significant (orange line below red line):
