I'm posting this for u/hooper359, who has done amazing work tracking GameStop subdomains as they emerge, but can't post into this sub. **Please visit his personal page and drop some karma on him if you appreciate finding out that GameStop is preparing a customer care service for its NFT framework.**

Hey everyone,

I've been tracking subdomains on Gamestop for awhile now cause they can reveal a lot about what a company is working on. If you'd like to read more on subdomains check out u/PM_ME_NUDE_KITTENS post

[here](https://www.reddit.com/r/DDintoGME/comments/p2rmgh/a_review_of_gamestop_subdomains/) that summarizes it all. My previous post [here](https://www.reddit.com/user/hooper359/comments/osr91k/new_ipfs_subdomain_possibly_for_a_digital_games/) was the last NFT related subdomain ([ipfs.nft.gamestop.com](<https://ipfs.nft.gamestop.com>)) that GameStop released, until today.

[Script output of new subdomains](<https://preview.redd.it/r92hbf77i0v71.png?width=372&format;=png&auto;=webp&s;=f115ed0b4e32bc970e1945c96a5f0568d1a1c154>)

The output above is from a script I run every so often which enumerates GameStop subdomains, a few new ones showed up today. GameStop appears to have created a new NFT subdomain: [support.nft.gamestop.com](<https://support.nft.gamestop.com>). Right now it is throwing a 403 forbidden meaning they are blocking external people from accessing it for now. If you go to the page it still has a favicon (the little icon next to the website):

[Zendesk favicon](<https://preview.redd.it/b0l1lv15j0v71.png?width=134&format;=png&auto;=webp&s;=20774de6a21eddf15a3bf3e653ae6a2eec23257>)

The logo in the favicon is for [ZenDesk](<https://www.zendesk.com/>), a popular customer service SaaS solution. While this is nothing major, it shows that they are in the process of building a customer service platform that relates directly to their NFT offering (whatever that may be).
