I'm unable to submit a limit order for GME using computershare investor center. Anyone else having problems? I complete the 4 step process, enter txt mssg confirmation code and screen refreshes but nothing after that. I've called and chatted with computershare twice and they don't see anything on their end either. I thought it might be VPN but tried from computer with no VPN and still nothing. Any ideas?

PS - I'm not selling but wanted to test the process. I entered a small number of shares with \$150k price per share.
