Hi, I need a little help.

Does anybody here have an email address for Computershare? My broker can't send rest of my shares to Computershare if they don't have an email contact with "the other side". They can't find it on the internet so they asked me. I already have a CS account with 10 shares but I also want to send more from this broker. I am an Europoor and this broker probably never did a DRS transfer so they need to help
