

Title: The same people who are laughing at the metaverse now are the ones who were laughing on the internet years ago. Don't let them fool you.

I mean back in the days, the introduction of the internet was one of the revolutionary additions to this world. But you'd still find people who wouldn't believe in the technology and just doubt everything. This is the kind of people who think the metaverse will flop. And obviously, they're wrong.

The metaverse is more than just a virtual space. It's a new world of a technology that we've never seen before. I mean it'll have an impact on everything, from social media platforms to entertainment, and everything in between. And gaming is getting the king's share from this technology. We're hearing about games that are expected to break records soon, such as the racing game, PizzaBucks.

So yeah, what I'm trying to say is that these negative opinions won't be changing the reality. The metaverse will be something huge, and it's a historic event.
