

Title: Super smooth brain question: Why won't limit sell orders go through on TD? It seems they are capping the limit sell at market price. (\*Not Selling\*) Just tested setting limit sell from \$350-\$10k and got the same error message every time. I'm dumb, but normal/legal to restrict trades to market price?

Error Committing Trade

Your limit is significantly higher than the last traded price. Confirm you are trading the correct security.
