Ok.... so... you're screwed and you know it now and you're Ken Griffin.

You're arrogant and you're going to do the best you can to screw as many of the people you can that have brought you to this level, or you think you can.

You sell off a piece of your 'money printing machine' for \$1.15B because you're running out of time.

What do you with that money? Do you pay buy back the naked shorts, the follow on rounds of naked shorts? The option swaps? Nah.... You show your total arrogance and ignorance like you've been showing since the start of this....

You take the money and, with some of your friends, you do your best to shake as many of those GME shares lose and try to buy them up by driving the price down as hard as you can and hope people paper hand or they have stop losses in place...

This is all my opinion... However, I believe it could be very valid at this point.... BUY AND DRS!!!!
