

Title: Capital are more than misleading.. I'm stuck with them. Own shares with them..and there's absolutely no difference in having the shares or the cfd.. I'll be messaging them again today for the 100th time about the same situation.. this time I have their very own bullshit to back me up ■

contracts for difference –
known as CFDs for short. So...
how do they differ from normal
stocks?

- CFDs vs shares:** on the Capital.com app and website you can trade CFDs, a popular derivative called contracts for difference. If you trade CFDs on stocks and
1. shares, **you do not own those stocks and shares.** You can't vote at shareholder meetings. But you do have a lot more flexibility than shareholders.
