Hi all.

Today was the 14th lowest volume in the last 10 years. AND the 2nd lowest volume day since our current journey began.

I haven't been around much because...life....

But I have been watching the volume on and off over the last few weeks. And today was like...WOAH!!!! I downloaded the volume history for the last 10 years and sorted it low to high...

As the title states... Arrakis is starting to look like the water planet in Interstellar.

I am posting a table of all volumes under 1,000,000 in the comments. Unfortunately, no high score in the left hand column....

Buckle up.

BUY, HODL, DRS.

EDIT:

In the realm of the current interest in the latest iteration of DUNE...

Litany Against FUD & SELLING

"I must not SELL. SELLING is the MOASS-KILLER. SELLING is the little-death that brings no MOASS. I will face the FUD. I will permit it to pass over me and through me. And when it has gone past, I will turn the inner eye to see its path. Where the FUD has gone there will be nothing. Only Apes will remain."

BUY, HODL, DRS!

EDIT(2): Per a request from the mods, I updated the title of the post to remove the possibility of being accused of casual racism. Edit(3): Another user pointed out I left it in the post.... removed now as well...
