Linked Post Content:

Hi All!

I want to start by saying that I am not a researcher and I do not specialize in anything related to this post. I am just an average person with an attention for detail and an obsession with GME. When I first noticed it, I posted it on twitter, though it didn't get a ton of attention. It's difficult to illiterate a lot of information on that platform, I find. It has different flair that I do like though.

This is my first real attempt of anything remotely wrinkle-brained pertaining to GME or any significant post on reddit. I would encourage anyone to verify, refute or, add anything to the discussion, as applicable. I may be completely wrong but I like the hype anyways, I hope you do to.

When GME released their latest and current Beta, I was looking at their stunning home page. I wanted know where we were looking. I started in Grapevine, Texas, of coarse, but It wasn't there. It did get me looking at the Gulf Coast, however, something was off...

I'll break it down into parts, but it is also good to have the overall screenshot of The GME marketplace homepage from a PC. (I think it displays differently depending on your device, which is pretty cool in itself). This way, you can better see the whole scope.

Let's look at the planet in the background first. I propose that we are looking at the Gulf Coast Cityscapes at night. See below.

[This is the Gulf Coast, as taken by NASA Gulf of Mexico \bottom\)](<https://preview.redd.it/mvflczy9k0t81.jpg?width=1041&format=pjpg&auto=webp&s=4c0d793bab9691fef7712b1df00c7ffe6ffdc230>)

[San Antonio \left\ Houston, Beaumont, Lake Charles, Lafayette, Baton Rouge, New Orleans \right\), Gulf of Mexico \bottom\](<https://preview.redd.it/hyu024vwn0t81.png?width=1678&format=png&auto=webp&s=32253c895b93d17756d1cf2f5a041aeb57dfeceb>)

[Planet in the background - GME Marketplace home page \Snipped and turned 90 degrees clockwise\](<https://preview.redd.it/5zxjtb4jl0t81.png?width=669&format=png&auto=webp&s=2a6633f68747b6849cecea81618f10ee19d299da>)

So we identified this formation of lights right?...but wait

If the Gulf coast is again at the bottom (as would make sense with lights to the North) in the above photo, the cities appear to be inverted, with Houston now on the East (right) side! If that's true, this is not planet Earth!

We'll come back to that in a minute, there's more! Let's look at the Astronaut more closely.

[GME Marketplace Astronaut](<https://preview.redd.it/iy3e88gZR0t81.png?width=985&format=png&auto=webp&s=9702d798b3b138f50e1681296f05f0ca01ee271d>)

[GME Marketplace Visor pointing](<https://preview.redd.it/f0ukhzkdt0t81.png?width=306&format=png&auto=webp&s=9702d798b3b138f50e1681296f05f0ca01ee271d>)

o;=webp&s;=9aafaad04817e11a8930a9d4cdd94d8afe13fe36)

Let's just note the moon right away!

Okay, now that that's out of the way, it looks like he is pointing at us, the User. We can also see, in his visor, that he could be pointing to a possible landmark as well. Is that possible? wouldn't his hand need to be directed towards the planet behind him for that to happen, IDK?

We also see same the cityscape, however, this time in the visor reflection. So is this the reflection from the planet we see in the background? I don't think it is. If we established the planet behind is indeed inverted, then this reflection should look like how we see it on a map. Instead it is also inverted! a mirror image of a mirror image would make a normal image, no? It also seems to be reflecting a different axis?

Man, I should have paid more attention to mirrors in school! I'm no mirror expert. Here's a link for anyone that isn't either. <https://www.physicsclassroom.com/class/refln/Lesson-4/Reflection-and-Image-Formation-for-Convex-Mirrors>

And to any mirror Apes out there.... Let's hear it.

In the meantime, let's get back to where he might be pointing...

In the visor picture above, I believe his hand is partially covering New Orleans and he is pointing somewhere near Hammond, just to the North. I don't know if there is anything particularly special about that, maybe there is, however, further North (where I think he's Actually pointing), is a town called INDEPENDANCE, Louisiana. We'll tie in it's significance in a minute. Note: this town was originally known as Uncle Sam.. that could be a whole other rabbit hole... or maybe it's nothing. Anyways, remember that whole #GMErica thing...

Here's the Wiki if you want to find out. [https://en.wikipedia.org/wiki/Independence,_Louisiana](https://en.wikipedia.org/wiki/Independence,_Louisiana)

[New Orleans and surrounding areas. Independance \(\top\)](<https://preview.redd.it/vm5n0n5l21t81.png?width=700&format=png&auto;=webp&s;=ee1f0b5d2a486a74d1a92c73dcdac90c19a68676>)

Time to tie it all together. If your not up to speed on Gamestop's partnerships and future direction, where have you been BTW?

I propose that:

1. The Planet in background is the representation of the metaverse, a reflection of earth, given the NFT marketplace and current or future (anticipated) partnerships with IMX and LRC, it's not hard to perceive.
2. The reflection in the visor is actually a reflection of Earth. If true, then there are actually TWO planets in this scene.
3. If there are TWO planets, the MOON is in between them.

...Insert Larry Cheng

[Larry Cheng -Twitter](<https://preview.redd.it/tbtrtr0851t81.png?width=586&format=png&auto;=webp&s;=17d94bbaf5c5fb1bb88269ea081e0f3da985f689>)

What is GME doing? Split trough dividend. FIREWORKS!

I would like to suggest that any split would be issued in dividends for a spin-off division (named GME-E or something, heard that going around), and issued as a cypto token asset? Remember, LRC has a decentralized exchange and i believe they also have the patent for it...

...Insert Byron.loopring

[Sounds daunting LFG!](https://preview.redd.it/spqjibxca1t81.png?width=586&format;=png&auto;=webp&s;=d605267784e625b5fe47fac37d34785f0bcf9f01)

[Byron to Elon, but GME-E \(\?) will be the first](https://preview.redd.it/yq825vk4c1t81.png?width=582&format;=png&auto;=webp&s;=7c7c21884cf844b6edc8419949006ee28fb41312)

\#BEYOUROWNBANK hashtag.... HMMM!!!

I don't know all the legalities or other loops involved to them actually getting this done, but it seems likely, if not at least feasible. You can find lots of threads about loopring, so I won't go on further about them.

...And don't forget about Independance, Lousiana.

I believe that Gamestop is telling us (pointing at us) that we will gain our financial INDEPENDANCE when the two marketplaces collide between two separate worlds and, that this event will send us to THE MOON!

[MOON SOON!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!](https://preview.redd.it/yucpwofef1t81.png?width=360&format;=png&auto;=webp&s;=1d1af72ee911d3dd4e441d0cede6d353642dd191)

Oh!... and then there is this, in case you needed more jacking of tits!

[Remove Before Flight, Pull to Arm](https://preview.redd.it/h5yph0qw21t81.png?width=447&format;=png&auto;=webp&s;=0c60035c715b8fc94dd8ab25f9ab7559e2af4533)

It appears our astronaut forgot to Remove this tag before Flight. These "remove before flight" tags were also known as "red tags". I guess he was launched without notice! I suppose it could also be a "pull to arm" tag too. And, even though I am in no way a financial advisor but eat crayons instead, a red tag is usually a deal right? you be the judge.

Here's the link:

https://en.wikipedia.org/wiki/Remove_before_flight

I hope you enjoyed! As above, leave comments below. I'm not in a rush to respond, but I am curious as to others thoughts!
