Anyone still using more than one account at this point in the GME saga?

I can't tell if this is a good idea or bad idea at this stage of the game. I feel like most Apes consolidated back when the Robinhood fiasco occurred. I did too and I feel like I'm with a brokerage that I can trust.

But I also left a side account open for some smaller trades. As I learn more and more about the DD behind all this corruption I'm getting more and more suspicious these peripheral brokerages could be problems in the future.

I mean, when the whole system is rotten, it's just so hard to know who you can trust! Robinhood sells all your data to Shitdell, why wouldn't others do the same?

(or maybe I just need to back away from the DD buffet line just a bit...)
