My shares are currently held in a TFSA account with TD. I should have a non registered cash account available to me by this Friday.

Am I better off selling some shares and buying them with my cash account? Or is it better to transfer them from TFSA to cash account? I really don't know what the ups and downs are of either option.

I'm not in a position to be able to buy more shares, so selling/rebuying or transferring are my only options.
