Hey everyone! Hope you had a great weekend. Well GME looks like it's about to blast off and I'm absolutely jacked! GME has never looked so bullish

[This is the 1 week](<https://preview.redd.it/wpmuxs64fig81.png?width=1428&format=png&auto=webp&s=ff37388ffbaa963dd5667503dbab565fa0e61c5b>)

GME broke out of the down trend and it looks like its consolidating for a big move up. I dare to say, Parabolic.

MACD (purple circle) is showing green again and looks like GME will Continue to go up

Stochastics ( pink ) is flatlining

accumulation distribution is flatlining (blue)

\-The accumulation/distribution indicator (A/D) is a cumulative indicator that uses [volume](<https://www.investopedia.com/terms/v/volume.asp>) and price to assess whether a stock is being accumulated or distributed. The A/D measure seeks to identify [divergences](<https://www.investopedia.com/terms/d/divergence.asp>) between the stock price and the volume flow. This provides insight into how strong a trend is. If the price is rising but the indicator is falling, then it suggests that buying or accumulation volume may not be enough to support the price rise and a price decline could be forthcoming.

Aroon indication (orange) is also flatlining

\-The Aroon indicator is a technical indicator that is used to identify trend changes in the price of an asset, as well as the strength of that trend. In essence, the indicator measures the time between highs and the time between lows over a time period.

GME being this Oversold, and consolidating like this. This to me looks like something big is going to happen.

Also gme finished at 0.00% neither up or down? I might be retarded, but me thinks moon soon

[This is the 1 day](<https://preview.redd.it/7w56dax2gig81.png?width=1446&format=png&auto=webp&s=69692e944a9ef99bdf5c4d399ccfd8bef2dab20b>)

The parabolic SAR flipped ( Purple arrow= bullish)

Stochastics (pink arrow) is flatlining

Double bottom on accumulation/distribution (blue arrow)

Aroon (orange) is also going up

LFG!

Also, I would like to take a moment to show how bullish GME's partners are!

[This is Im mutable X 1 day](<https://preview.redd.it/j2i0tqphhig81.png?width=1434&format;=png&auto;=webp&s;=307f659572585cda6ae1c5b5c9fa25288cd09b4b>)

GME's new partner is now in an ascending channel

stochastics (purple) is showing a reversal

A/D (pink) is going to bounce soon

Aroon (orange is showing upward) momentum this week

Also, the Parabolic SAR is flipped to confirm this bullish trend

[This is I o o p ring 1 week](<https://preview.redd.it/k6vma5w4iig81.png?width=1428&format;=png&auto;=webp&s;=a09b4dbd487929be9cdeac1429a446319f8acd03>)

MACD (pink) flipped to green histogram

Stoch (pink) is about to have a golden cross

Aroon (blue) is about to bounce

TLDR: GME and it's 2 partners are all showing that they are over sold. They are consolidating and showing signs of a reversal. Looks like something big is coming!

TARD: Moon Soon!
