Hello my family of apes With the recent uptick in CTB in all the brokers we are tracking, a huge question has arisen that I would like to share with all of you and discuss about it.

[Iborrowdesk CTB Ratio](<https://preview.redd.it/9hkgy5at1r491.png?width=1166&format=png&auto=webp&s=31e1e1781559539faa69dc2005d3425c9397504f>)

The CTB has been rising exponentially with jumps of up to double the amount, reaching more than 100% in most cases, 36% in Fidelity and more than 226% in ORTEX. I firmly believe that this has been due to the hypothetical and long-awaited dividend that our beloved Gamestop gives us, so the brokers have been raising their CTB rate so that no more shares were requested before this event. After the shareholders' meeting last Thursday, the 2nd, the rate has been falling, reaching 50.8% today at IBKR

[Today's CTB in IBKR](<https://preview.redd.it/grasb0s93r491.png?width=1407&format=png&auto=webp&s=d9b91a6a2826aec2ab94bf4726819c0c13ce5f6c>)

My theory and I would like you to share your thoughts with me is that the GameStop board and Ryan Cohen would know the hype of the dividend and they would let this date pass without announcements so that the CTB would go down again, that is to say more shares will be borrowed and more will be created short every day and once this happens, they will launch the dividend date, causing absolute chaos in the stock market.
