Hey everyone! hope you are doing well. I just wanted to share my updated charts I colored on. This isn't financial advise, I am retarded and eat crayons. Very consistently when we have 1 day crossovers on the MACD GME see's a decent spike in price. It looks like we will have 1 tomorrow.

[This is the 1 day chart](<https://preview.redd.it/qc5uponc2cf91.png?width=1131&format;=png&auto;=webp&s;=4f5a390bd041a56af14e6279082e3f7d5212775b>)

It's been a couple weeks since my last TA when I said we were going to have a positive break out from a triple bottom. We did have 1 and after the splividend short hedgfunds shorted it down like back down under the critical resistance line. Good news is that after today, GME broke out of it again.

MACD (Purple circle) - is highlighting the crossover that's about to happen

Stoch (green) - golden cross

A/D (red) - is going up

Aroon (orange) - going down, likely because of the ridiculously low volume

Overall - I think GME is going to pump in the next couple of days. I think 40 is possible. There is a strong resistance at 37-38 and if GME doesn't break that it could be in a head and shoulders pattern and dip down to around 34 (which is max pain for the week) I believe this bullish momentum is confirmed with the 4 hour chart.

The PSAR flipped (green circle) - this is very bullish

MACD (purple circle) has had a golden cross and a positive MACD crossover.

Stoch (Orange) - has had a golden cross, is going up, and diverging

A/D (pink) - is going up

Aroon (yellow) - is going up

Overall - All indicators are pointing up, making me more confident in the 1 day analysis.

On a Macro level we are still in a positive cross over on the 1 week that happened in 5/26. I still believe this run is the one that will take us to Uranus

I drew in 2 purple line on the MACD to show the run GME is still in. I think this could be consolidation before we see a Moon candle. GME broke out of the mother of all Doritos again. This definitely should be an interesting next couple months. We will all be very very rich within the next 4 months.

TLDR: GME is about to have a crossover on the 1 day MACD. I speculate it could test 38 - 40.

TARD: We're still on the way to Uranus. Keep buckled up
