Good morning and Happy Memorial Day!! I wanted to get some thought process on this and see if there is any merit of when GME might truly run. There are obviously 10 million theories lol and this is mine. If the tokenized stoke theory holds true and we stake our shares as the liquidity pool, do we have to wait on ethereum's upgrade to proof of stake in August? If so, we would be looking hard at the September cycle. Thoughts? Link below:
