

Title: The REAL reason for the AH run up. Every article you read is a lie! Retail had absolutely NOTHING to do with it.

To me this is the best evidence in a LONG time that the HF's are short and doing EVERYTHING they can to get people to sell GME and popcorn. Along with the panel with Charles Gradante as he tells it like it is. The reactions of the other HF managers on the panel are priceless.

The FED minutes that crashed the market, speeding up the bond purchasing tapering, speeding up interest hikes to as early as March with the possibility of an additional 4th in December has the HF's scrambling for liquidity. Don't be surprised when they continue to short the hell out of GME but their can kicking is going to hit the wall in 2022. Which is great news for Apes as you should have the majority of your shares older than 1 year +1 day and pay 0 taxes on capital gains. HEDGIE'S R FUK'D!

Continue to buy dips, AS MANY AS YOU CAN AFFORD and HODL. DO NOT BUY OPTIONS. The stock is being manipulated too much and they just extend the life of short HF's even if you are making a profit buying them. Sell covered calls all you want to hedge your losses when they drop the stock like yesterday intraday but remember you are also capping your gains. Sell a call at the wrong time and you will regret it the rest of your life.

2022 is the year King Kong climbs up Wall St. and beats his chest and then commences to SMASH the buildings to the ground.
