Hey Everyone! Hope you are all doing well. It's been a while, but there's not much TA to give when we're in a market crash. Guess what though! GME is an idiosyncratic risk (or some other big word, i'm sure you guys know what i'm trying to say) so it doesn't have to follow the shit show that we are seeing in U.S. markets. There is 1 indicator that has been very successful in predicting big green candle days and that's MACD Crossovers! Also T + 2 for all the puts that were bought a year ago last friday that expired worthless is tomorrow. So I'm very confident in saying BIG GREEN CANDLE DAY TOMORROW! lets goo! here are some charts I colored on for your viewing pleasure.

[This is the 1 day chart](<https://preview.redd.it/gdo0w182va191.png?width=1125&format;=png&auto;=webp&s;=839255902195ef27f9f4aa95d13cd2607bfc8fd6>)

I circled (purple) the most important indicator on why I think we're going to see some big green candles. Every time we had MACD cross over we have seen green days. Combine with T + 2 from the worthless puts that were bought a year ago tomorrow is going to be lit.

Stoch (pink) is going up

A/D (blue) is going up

Aroon (aroon) is going up

PSAR (Yellow) is flipped and going up

Overall - we had this set up 3/21, we also saw a significant run last year before the share holder meeting, MACD is about to cross, wallet is live. Tomorrow is going to be lit! buckle up boys and girls. shit is about to get wild. Just a friendly reminder, the true squizzle starts when shorts default and closing goes to the DTCC computer. If the 63 trillion dollar insurance policy they have isn't enough, the FED has a money printer. also after a dividend announcement DTCC has 30 days to provide the shares. and if they don't then GME can recall their shares and take it to their own exchange and then they have 90 days to cough up the shares. either way hedgies r fukt

[Me and they boys remembering how fukt the hedgies r right now](<https://preview.redd.it/k3ebmc46ya191.png?width=427&format;=png&auto;=webp&s;=713bc57f766d5b84839643392e47dcb420d81e55>)

[This is the 1 week](<https://preview.redd.it/ayv0xyqcya191.png?width=1119&format;=png&auto;=webp&s;=9c00c73c1da58fdb6946a94220819088c8f389de>)

just wanted to zoom out on the maco level. I think peak squizzle is towards the end of the 30 day window the DTCC has to provide the shares for the dividend (or whatever daddy R.C. chooses to do) We're all going to be rich very soon! remember, we're going to take money from the most evil and powerful people in the world. Get wrecked hedgies!

TLDR: Big green day tomorrow from t +2 and MACD cross over

TARD: Moon Soon!
