As you all know, we almost hit 2 trillion in RRP, an insane figure to say the least.

Meanwhile, people are drowning in debt, on the verge of homelessness and would be if not for the eviction moratorium, and most of us who are working have been overworked, UNDERPAID, and abused.

Why is this huge amount of money being put up to the fed every day? Why nit use it to help americans?

Simple.

BECAUSE THEY CANT MAKE MONEY WITH THAT MONEY.

Let that sink in: rather than help fellow americans, theyd rather park excess cash with the fed USELESSLY, while everyone quits due to burnout, workplace abuse and low pay. And that's not even including all of the illegal stuff at workers have had to put up with over the decades that is now coming to light.

We have to find another way to organize society so that the best thing someone can do isn't solely to make more money. That's not how a healthy society can function.

When MOASS is done, with our GME tendies in hand we need to remember that business is to IMPROVE THE WORLD, and NOT to just make money.

Kick cynicism to the curb, and lets show these wrinkled old fucks how its done. Theyll be watching from jail, but they have TVs in there so its all good.
