Ryan Cohen buys BBBY shares and calls in March 22.

Apes know about this for ages.

Some apes buy BBBY the weeks after.

BBBY gets hyped on 2xUSB.

BBBY gets flagged "The new Gamestop".

Cramer hates on BBBY (inverse Cramer kicks in).

Ryan Cohens filings and holdings get hyped on 2xUSB.

BBBY skyrockets.

Ryan Cohen suddenly is the saviour of 2xUSB.

Ryan Cohen sells.

2xUSB gets spammed with posts that Ryan Cohen betrayed everyone and "apes" should stick it to him by selling their GME. (Yeah 'cause we all are a bunch of kids who got their sweets taken from them. You think investing is a damn game?)

Ryan Cohen gets reported to the SEC and is being called for a subpoena on the same day.

Now i don't know how many crayons you ate today but this shit sounds like an obvious play to discredit Ryan Cohen and Gamestop shareholders.

They fucking shorted Gamestop right at the time BBBY fell to make it look like "apes" were mad and sold both.

I'll tell you what. I made money with BBBY, i got out when i should have and every penny is going straight into GME and DRSD. Everyone knows 2xUSB is full of bots, most of the posts hyping up BBBY were new accounts.

Losing faith in Gamestop? Today convinced me even more those crooks don't care for anyone on this planet but themselves. Threw a bunch of investors under the bus just to form a false narrative.
