Hello, fellow apes and appettes. I'm the guy that posted a month back about Virtu owning Simplex Trading, and I am also the guy that found out when L00pring's updated webapp was going live based on their coding.

Today's DD isn't as juicy as the previous ones, but I am here to tell you that we are less than a month away from Citadel Securities releasing their financial statements. This could be revolutionary DD for apes, especially for the information contained within the financial statements. As an accountant, I can tell you all that I can't wait to get ahold of them and decipher every last piece of information contained within them.

Citadel's 2019 and 2020 financial statements were issued on February 24, 2020 and February 24, 2021, respectively, which means we should see them issued around February 24th of this year as well, which is less than a month away. Finally, we will be able to see just how much pain we have caused them over the last year, and we will get to see exactly how much money they have lost, and how much more pain we can inflict on them. Once we have the financial statements we will have a much better understanding of how GME shareholders are winning.

Sit back, and relax, everyone, because first they ignore you, then they laugh at you, **then they fight you**, then you win. They are definitely fighting us now, especially with the whole Apex IRA DRS thing.

LFG!!!
