Hey Everyone! hope all is well. What a shit show huh? full market crash, Good to see that we've been right all along (terrible for the people who choose not to listen). I just wanted to share some charts I colored on to show you guys what I think will be a good buying opportunity. As always this is not financial advise and I eat crayons. I appreciate your time to read this analysis. To be clear, Squizzle only happens when they are force to cover. In my opinion, it will be around 30 days after the dividend announcement (6/9?) after announcement DTCC has 30 days to cough up the shares, if they don't then R.C. can do a share recall transfer the stock to their own DeFi exchange. At which point DTCC has 90 days to provide the shares. Either way, hedgies r fukt

[This is the 1 week chart](<https://preview.redd.it/joa73wuitky81.png?width=1130&format;=png&auto;=webp&s;=fd06ccd72aa3c84874da46656562f50e932225a3>)

The important thing to point out is the purple circle. This is one of the most reliable indicators that I use. MACD is about to enter a death cross.

PSAR (red circle) flipped to bearish

Stoch (pink) is going down and diverging

and A/D (blue) - is going down and is about to break a support

the interesting thing is that the aroon is positive, which tells me that the price is all bullshit

overall - strong support at 90, with a potential bottom at 75

basically gme is going down with the market. luckily for us all my homies buy and hold so at some point gamestop is going to find the ape support line.

MacD (purple) is heading to a support that it looks like it will break

Green circle showing that the other 3 indicators I use are going down and 2/3 broke support

Overall - hope everyone is buckeled up. It's going to be a shit show until daddy R.C. comes and saves the day

TLDR: support at 90. I think 75 is going to be a test to see if that is the bottom. Between now and the next announcement is the best time to buy shares before we blast off

TARD: Buy the Dip, moon soon!
