I would watch for changes in "nft.gamestop.cum" or "boyholddrs" and "expose wallstreet...."

Once the square changed a quick look at the profile would show some variations but a steady pattern too.

Most accounts changing the image were from meltdown or bets. Most were also accounts that were older with no activity.

Most of the accounts on this list are because they were active in gme subs AND changed a pixel where it shouldn't be, AFTER THE LETTER WAS COMPLETE.

One showed up in a comment thread on another post. My comment with 50 upvotes was deleted after I called him out. Here is the list.
