Europoor X Hodler, Jan21 Etoro user here.

I unfortunately started out in Etoro, and managed to throw in all I can along the way.

But I want to DRS my GME shares, and with the dip this juicy, and it could get dipper...

I've decided that my next purchase is to going to be in IBKR, as I've heard I can transfer out of them into computershare and join the purple circle gang.

I've literally just registered and verified my account, not even deposited funds as I don't get paid while Friday.

What's my next move?
Please help, brain smooth x
