Hey, I have my GME shares in a CFD broker so I'm looking to rebuy in IBKR but I'm really confused about the process. So, I've set up an account, it has been approved except I haven't added any funds yet. So when I open the app and login it always asks me to review and finish my application, but when I click on it, I get logged out and after logging back in, same thing happens. It's really confusing. If someone who has been in the same position before could make a simple step by step guide on how to proceed I would be really thankful because it's so confusing right now. Also, is it normal to get charged interest for depositing? Or can I use a certain currency to remove the interest? Thanks so much in advance to anyone who can helpout, really appreciate it.
