Hello fellow apes, This is not FUD- All I want is ELI5 explanation.

I know that there is constantly battle between if we should use options, if we should forget about it. But I want to use options, I have \$\$\$ to do it and I want help to suppress the GME price with the help of the options. All wrinkled apes are talking that we should use ITM calls to fuck Kenny hard and force Shitadel to sell the shares. But , if we are expecting the price appreciation in the upcoming months, why we should not use OTM calls? Can anyone explain this to me like for retarded capuchin monkey? Also summoning u/Gherkinit from the graves ;p maybe you Sir can explain?
