Hello friendly apes. I am jus a lurker, in need of your help. I created my Gamestop wallet, but I am trying to activate L2, and the wyre transfer is not loading when I am supposed to imput card details. Did any of you had this issue in the past?

PS. If there is some of you so kind to help, please do so only after you checked my profile so that you can see that I trully love this company, but in my country there are no shops, so the wallet is the only way to support it.
