Technically indicators show that GME has crashed below the 50-day MA. The MACD indicators are pointing to bearish momentum. The bearish momentum is likely to continue as the meme-inspired rally comes to an end.

Summary

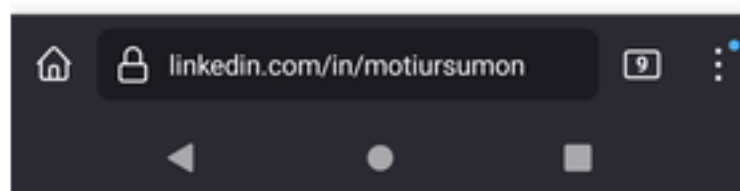

The GameStop rally was inspired by speculations. Investors buying the stock need to know that a bubble could burst as the price declines. The stock has fallen below a key 50-day MA, pointing to a building bearish momentum.

About

Here you have a highly efficient, results-driven, and capable digital marketing strategist with a proven ability to effectively develop, manage and control relationships between the company and its target audience.

Is GameStop's meme rally over, or the stock carries some juice to be squeezed?

By: [Motiur Rahman](#) on Aug 19, 2022

- GameStop has been rallying at the back of a retail frenzy.
- GameStop Chairman revealed a stake in BBBY fueling meme surge but later revealed an intention to sell.
- The stock trades down 7% as the price painfully crashes below the 50-day MA.

If you love GameStop Corp ([NYSE:GME](#)), you

should know how hard it is to get a better
