Imagine the GameStop marketplace is launched.. You on-ramp your fiat currency into Ethereum on L2 for some fun NFT purchases, but then, you realize that maybe you put a little bit too much money in and want to deposit some back into your bank. Or your NFT sells for a high price and you want that money in your bank. But you can't, because there isn't an off-ramp to do so. That would feel BAD!

RC would never want his customer to feel bad at any point. I believe that once you can move your currency on and off L2 with ease, then we will get the NFT marketplace. Thoughts?
