The screenshot shows a mobile application interface for 'Orders & Trades'. The top status bar indicates 4G connectivity, 69% battery, and the time 9:09 pm. The app header includes a menu icon, the title 'Orders & Trades', a search icon, a notification bell with a red '1', and a settings icon. Below the header, there are tabs for 'Orders' and 'Trades', with 'Trades' being the active tab. Under the 'Trades' tab, there are date filters: 'Today', 'Yesterday' (selected), and 'Mon Jan 24'. The main content area displays a table of trades with the following columns: INSTRUMENT, TRADE TIME, ACTION, QTY, and COM. The table contains four rows of data:

INSTRUMENT	TRADE TIME	ACTION	QTY	COM
GME	18:51:29	Bought	3	
GME	18:49:49	Bought	30	
GME	18:46:09	Bought	1	
GBP.USD	18:41:20	Sold	2508	

At the bottom of the screen, there is a navigation bar with five icons and their corresponding labels: Home, Portfolio, Trade, Watchlists, and Account. The very bottom of the image shows the standard Android navigation bar with back, home, and recent apps buttons.
