I am teaching myself how to create NFT's (as one day maybe be a creator within Gamestop NFT Marketplace), however want to incorporate Audio. Just trying to more understand real world use for Voice overs, within the NFT realm. Can an NFT eventually be an entire ecosystem in itself? Or would NFT's be individually used within a larger ecosystem like a hotel, shop, skatepark etc? Would there be an NFT Audio that advises of items available for purchase? I hope I am making sense..
