I will link a resource that I highly recommend a team of people dig into ASAP as this situation has the ability to escalate very quickly and could potentially deteriorate international trust in the US stock market.

https://www.reddit.com/r/Superstonk/comments/whkrz2/the_dtcc_has_committed_international_securities/

The fact that the DTCC has released to international brokers, instructions to carry out GameStop (#GME) Stock Split Dividend as A regular stock split even after receiving clear instruction from GameStop Corp. Evidence seems to point that it is highly improbable that this could have been a mistake but that is for you and now im sure at this point, the FBI, SEC, and dozens of other national and international news broadcast stations, at the very least, to look through the available evidence and speculate. Individual investors of GameStop from all over the world are noticing and concerned of the wellbeing of our investments because of the DTCC's seemingly purposeful failure to carry out A task which it is, AND HAS BEEN, responsible to perform and has done so flawlessly on countless occasions involving other tickers. Speaking up on this situation is my responsibility as an investor and I am passing this to you in hopes that you can see the possible gravity of this situation and carry out your responsibility to provide people with current events. Thank you for your time and hopefully this resource can help give your team the jump on this very breaking international story.
