I just thought about this no other company in the world has partnered/collected the technologies that can support a better future for everyone (DeFi and Be Your Own Bank), but not only that, the investors are ■s, they are regular workers and regular people just trying to earn a buck and with that buck alot are going to attempt to help/heal the world (many have already donated to campaigns to show their good will to show just how serious they are, and yes research will need to be done but many are going to set their own organizations up with those ■s). These ■s won't just do good/reduce harm to others, they will also be taken from those who continually do bad/harm others constantly for nothing more then another digit on their net worth. This is the most incredible chance of ever, for a group of individuals and a company with an amazing Chairman Ryan Cohen being set up to actually transform the world for the better. Be proud ■s be proud ■ for as much as RC and the folks at Loopring IMX and many others responsible for what will come (Mother Of All Short ■s and 100% Retail Ownership through DRS) ■s are equally part of this story.
