The total shares sold short is exactly the same on 1/21/2022 & 1/24/2022, 22,180,000 total shares short. However, the shares outstanding is quite different.

3,100,000 shares outstanding on 1/21/22

$22,180,000 / 3,100,000 = 7.1548$ or 715.48%

6,200,000 shares outstanding on 1/24/22

$22,180,000 / 6,200,000 = 3.5774$ or 357.74%

Can anyone with some wrinkles please help explain?
