New apes and investors, if you're aware of stop losses, please feel free to skip this post. Otherwise, please read on. Basically, with PFOF, funds can see where stop losses are. They can drop the \$GME price to that point to trigger them, causing a cascading effect of downward pressure without them having to expend additional ammo themselves. Plus it adds to liquidity by freeing up those shares for funds to exploit.

TL;DR Stop losses help funds drop the share price while saving them money in doing so.

And since it's Wednesday, might as well consider registering some more shares if you haven't already.
