First, for those who don't know me, I'm the guy that comments and cheers on 98%+ of purple ring posts. I'm xxxx all in GME, 100% DRS. I'm on here many hours a day every single day. I love encouraging and helping others. ■■■■. If you have questions or concerns, please comment or PM me and I will have, or find, the answer for you. Every single reply to this will get a response.

My biggest worry about DRS numbers is that once all apes who are going to DRS do so, the CS account high score will completely stop growing (except for apes still acquiring multiple accounts), and then our DRS total will only increase by the amount of shares existing DRS apes are adding. Then, instead of our numbers growing by 3-4M per month, they will only grow by maybe 500k per month (educated guess). At this reduced rate, it would take several years to lock the float!

#This is why these 3 things are CRITICAL!! :

1. The **\*\*word about DRS\*\*** and GME fundamentals needs to be spread to the masses **\*\*outside of Reddit\*\***. If every ape would just try to reach 1 other person outside of Reddit each day, the float would be locked in no time! Twitter, FB, real life, etc. EVERY APE can do this and can start now!!!

2. Apes with money tied up in **\*\*other investments could convert those to GME and DRS\*\***. Consider trading in your "other investment" now. It's the perfect time before the markets tank. Even IF both spike, only GME has a turnaround plan that can launch the rocket.

This could also include taking the tax hit or DRSing your IRA if you can. **\*\*IRA DRS new link : \*\***

3. Apes with shares in brokers that will not DRS, such as **\*\*Etoro and T212 : think about selling and re-buying elsewhere!!\*\*** They don't have the shares anyway, so selling hurts nothing! Please don't trust your millions to a broker that won't DRS! Read your TOS.

Great comment from u/mia6ix :

"Shorts aren't closing positions voluntarily, for one thing. Their whole plan was to never close, and they sure aren't doing it at \$100 or even \$50/share. For another thing, shares held in eToro aren't even traded on the real market. Their TOS makes that clear. Apes who "own" shares at these so-called brokers that won't allow them to DRS are stuck with a position that probably isn't even real, and will likely be force-liquidated at the first hint rocket launching. If all those apes dumped these crappy brokers and re-bought shares on the open market AND DRSED them, we'd have the float locked and some real buying pressure, finally."

Credit u/Life\_is\_Good22... **\*\*GREAT\*\*** new video to share with Joe Public! : [https://www.reddit.com/r/Superstonk/comments/smf7y1/retirement\\_accounts\\_are\\_giant\\_ponzi\\_schemes\\_why/?utm\\_source=share&utm\\_medium=ios\\_app&utm\\_name=iossmf](https://www.reddit.com/r/Superstonk/comments/smf7y1/retirement_accounts_are_giant_ponzi_schemes_why/?utm_source=share&utm_medium=ios_app&utm_name=iossmf)

More detail about how I know #1-3 are so critical :

There is nowhere near 700,000 of us on Superstonk and other GME subs. The vast majority of 'accounts' are dead/dormant accounts. I think it would be generous to say there is even 250,000 apes here.

On the subject of the number of CS accounts ... yes, the high score account number being 1243xx (sorry I can't wait on the high score guy) means there are 124,300 account NUMBERS. However, there are many apes with 2 or more CS account numbers. I've spoken to many apes that have 3-6 different account numbers! This is exactly why roid\_rage\_smurf (DRSBOT guy) has added the new CSX feature. PLEASE support this! **\*\*Simply go back to your original CS post and comment:\*\***

**\*\*IDRSBOT:CSx!\*\***

where x is the number of different CS account numbers you have.

**\*\*Important:** do this even if you only have 1 account or even if you posted long ago. **\*\*** Otherwise no data is entered for you and if mostly apes with multiple accounts report, it will skew the CSX data higher/DRS total lower. Help spread the word. You can see in the comments section of each purple circle post whether someone has yet to report CSX number.

After collecting data from the first apes that submitted a CSX number, the number of accounts per ape is 1.36. This reduces the 124,300 CS accounts based off of the high score to actually 91,397 "unique ape-CS accounts". (Maff=124,300/1.36)

This is why BOT and CS.net numbers were so far off from GameStop's earnings release number of 5.2M on October 30!!

#91,397 x 160.49 = 14.6M shares DRS'd.

This is the current number of accounts per high score 124,300 adjusted/divided by 1.36 because of apes with more than one account, multiplied by IDRSBOT average shares per ape:

You can already see on u/stopfuckingwithme 's high score post graphic, that the rate of new CS accounts over time is substantially dropping. (Not reducing for CSX), **\*\*Only 10,000 high score accounts were added in January versus 17k in Dec, 15k in Nov, 34k in Oct.!!! And now only 4300 in half of February!!\*\***

Next, all too often I see posts using ~33M as the float, but I'm convinced that is wishful thinking. Existing shares of ~75M minus insider shares of ~12M (even IF all of those are registered) = 63M shares that probably need to be DRS'd. Do you really think hedgies can't use NON-DRS shares (institutional, mutual fund, and ETF) to continue their manipulation?!? So, even IF there are actually 250,000 apes on Reddit, the average number of shares per ape would need to be 252 to lock the 63M. Obviously this will take a much longer time to accomplish. Even if we DRS 5M shares every month from October 31 2021 forward, it would take us until the end of the year to DRS the 63M shares.

This post is meant to be purely motivational and encouraging. I think if and when GameStop releases the CS numbers as of January 29 in their March release, we will be lucky to be at 16M. Don't wait for that number. Get off your butt and spread the word to the masses outside of Reddit NOW!!! and DRS your max! I don't trust any broker now. I certainly won't trust them not to screw us over during rocket launching and/or when they're facing insolvency. Would you put \$50M in a bank account in your neighbor's name? Then why would you leave your GME in the DTCC's name?! I don't say this to scare anyone, I say this because I love you and want you to get your tendies.

#Changing the world is what's at stake!!

**\*\*BE THE CHANGE!!\*\***

Edit: I barely understand Twitter. If I can do it, you can do it! A couple of my tweets have received over 100 views each. Here is text of one as an example for others to use:

"#DRS Direct Registration of your Shares takes them OUT of the criminals' hands: DTCC, Short hedgefunds, MM/market manipulators, and puts them in YOUR name. No more lent shares! #GME #Superstonk"

For newer apes, please check out computershared.net by u/jonpro03.

#TLDR: DRS your max! Spread the word.  
#LOCK THE FLOAT!!!
