I know people have stated that they will sell 1 stock and hold the rest.

My individual plan is to take a loan out against the value of my GME, thus holding on to it for even longer then they anticipated. This is what rich people do these days to keep their assets and provide some liquidity AND to avoid capital gains tax.

Think about it, when it goes up and we all sell just 1 share it will just play into the hands of the hedgies and help them dig themselves out of their hole. Do you think RC will ever sell? nah bro. Instead I want them to bleed and come to me crawling on all fours begging, while the price keeps going up. I believe this is the final nail in the coffin.

I also eat crayons and don't have any wrinkles and it took all the power from my two only braincells to put this thought together.

If anyone thinks this is a bad idea or that I'm missing something please let me know because this is my first post. Apes strong together.
