

Title: How to transfer to ComputerShare for Americans wondering why you can't create an account: Call your broker and request a DTC Transmission request to send X number of GME to ComputerShare. Will take ~10 business days to arrive. Buy, Transfer & HODL apes, we've always been the MOASS creator & catalyst

How may I help?

You at 14:09, Sep 15:

Hi there - I keep receiving an error each time I attempt to create a computershare account with my zipcode & SSN for the GME ticker as well as using the Holder Account Number option - I keep receiving the same error notification. How can I begin the process of moving control of my broker held GME shares to be registered under my name?

Olga S. at 14:10, Sep 15:

I see, do you mean you don't have shares under computershare yet?

You at 14:10, Sep 15:

I do not

You at 14:10, Sep 15:

I understand I have to purchase a share first then?

Olga S. at 14:11, Sep 15:

I see, you need to contact your broker first for them to initiate the transfer. They will need to submit a request for a DTC WIT Transmission. Computershare cannot initiate this transfer.

If the broker is unfamiliar with the DTC Transmission process, they should contact their back office for assistance or contact their representative at DTC.

You at 14:12, Sep 15:

Thank you, are there any fees charged by ComputerShare for this process?
