I gamble (oops I mean invest) with Questrade out of a TFSA account. Are my shares already registered in MY name? I'm in the process of moving most of my shares over to Computershare but I keep seeing Canadian apes saying any shares purchased through a TFSA are already in my name. Can someone please clarify? Maybe with a source? If that's the case, I may cancel my transfer, and save myself the \$300 transfer fee and the headache.
