I've been trying for an hour and just can't figure it out what I need to do to be a part of GameStop's NFT marketplace. I've never had a wallet and never bought ETH or any crypto.

First I go ok, I need a wallet, let's do loopring smart wallet. I get the app and start the process.

Then i watch the tutorial and I need ETH? In another wallet, to transfer and make the wallet real?

I try to add FIAT direct using RAMP but RAMP doesn't work because it needs a selfie video and that feature just flat out did not work - blackness only. So I have to find another way. The other FIAT payment option did not appeal so I thought I'd try an alternative method.

I don't have anyone to ask for L2 and I don't understand that. So ETH on L1 it is???

So I go to Coinbase, open an account and get verified. I try to add my credit card but mess up my area code and I'm locked out for 12 hours.

PayPal is another option to I go back to my old account and after struggling with passwords and forgotten unconfirmed emails I add my PayPal to coinbase.

I go to buy ETH, but I can't use PayPal. OK... do I need a wallet. Oh, there is another app...

I've installed the following apps:

Loopring  
Coinbase  
PayPal  
Coinbase Wallet

What the fuck am I doing?? Please help me!
