Hey everyone! hope you had a great weekend. Anyone else feel like this is the calm before the storm? Well the chart looks even more bullish then last week. For those that don't know this by now, I am retarded and I eat the crayons after I get done using them

[This is the 1 week cahrt](<https://preview.redd.it/8wkj6bro2uh81.png?width=1445&format;=png&auto;=webp&s;=140f89925b427ba9d3efbae378f7afcf694b7e57>)

GME is slowly climbing up and I think a big green candle is coming soon. There is a hard resistance at 125, but hedgies can only supress the price for so long. Don't forget, there is an exposure window the week of 2/24.

MACD (blue) is still in the negative and is trending up.

Stochasits (pink) is diveraging and going up

Accumulation and Distrobution (purple) is flatening

The Aroon indicator (red) is trending up

GME is still way ovesold and a big bounce is going to come soon!

[This is the 1 day](<https://preview.redd.it/9sj0nn4z4uh81.png?width=1436&format;=png&auto;=webp&s;=f5c56e9bcb3ee9463e7c7909fd2cf4ee44a177ee>)

Looks like GME is going to sag down a little bit before a bounce.

The MACD (red) is showing a red histogram

Stochastics (purple) has a death cross

A/D (pink) is trending down

Aroon is also trending down

Givin the 1 week chart being so bullish and GME is in an ascending chanel, I feel like a bounce is going to come later this week. The PSAR is flipped (bullish). We have strong support at 105. Although I think it will bounce off of 115. Great time to take advantage of some dip before GME rips up again.

Max pain is 122 for the week

[MAX pain is on the top right](<https://preview.redd.it/ezu7xy5n6uh81.png?width=1584&format;=png&auto;=webp&s;=9255da83cd0d6d2152f759d2a34b4e02df4649c9>)

This chart shows open interest for this Week.

Could be sideways trading and end at 122, or... we can bounce hard and go to 200+

What is interesting to me is that the week off 2/22 (the exposure window) hedgies put up a big put wall

[This is open interest for next wee week of 2V24](<https://preview.redd.it/2obh1dc47uh81.png?width=1463&format;=png&auto;=webp&s;=76140504100ccdbc4e4f54d2ab97f29d6f2c55cf>)

MAX pain is at 118, but there is alot of open interest at 140 and above.

As you can see with the blue circle, they put up a massive put wall at the 100 dollar range.

I think hedgies r fukt, and don't give a fuk about the F T D's anymore.

At any rate exciting times ahead, and I trust R.C. and company have a fuk you move planned to send us to the moon. Shorts are loosing control and it's only a matter of time

[This is the 4 hour chart](<https://preview.redd.it/avi1ewot7uh81.png?width=1455&format;=png&auto;=webp&s;=f8d20690f264fb434ba7ed1615e2bfc61056857a>)

GME is saggy down and I think it will bounce later this week. I think 140 is in the near futur

Stochatics is flattening and Looks like a golden cross can happen soon

Aroon is flatening

TLDR: GME is going to sag down for a little bit before bouncing. I think 140 is doable with this upcoming bounce

TARD: GME go brrrr
