Hello reddit.

ChopSticks = Computershare? PROVE to me how. I say Chopsticks = KUAIZI in chinese, A company that develops AI that can make ads on the fly from your session data from google. That company is in china. That company is creating that AI to target fucking children, so PG-13 that shit.

1v1 me

[the_everything_short](https://www.reddit.com/r/GME/comments/mgucv2/the_everything_short/) DD by /u/atobitt I was able to learn a lot about things. Palafox was a rabbit whole. ILY Atobitt. My hat's off buddy. Well I discovered something that I think is worth talking about here. In Atobitt's writeups that followed:

[https://www.reddit.com/r/Superstonk/comments/nlwqyv/house_of_cards_part_3/](https://www.reddit.com/r/Superstonk/comments/nlwqyv/house_of_cards_part_3/)

We should all have an established view by now how Puts are used in dark pools and how divorced puts are created. How they used to borrow shares and re loan them OVER and OVER through high frequency trading "exploits" that allowed extra positions(derivatives or otherwise) to be created.

So the thinking started when I crossed these strange entries in a certain companies 13f's. IFP advisors was the focus of mentioning in the L-Bond video on my YT. It was also the focus in the Sears tweet breakdown to show they were the ONLY receiver of GWG Life bonds in the world. But, imho, if you haven't seen the [L bond video](<https://www.youtube.com/watch?v=hG0AUPEhrJU>) , this would be the time. It would make a lot more sense how I got here. I [tweeted](<https://twitter.com/itsalwaysrains/status/1449777616429334530?s=20>) the discussion that was led by my wife's favorite bear /u/fuzzybearBTC.

[see?](https://preview.redd.it/ywh75j7yovt71.png?width=1115&format=png&auto=webp&s=d54abeedcd5f65a98f8c6031f518dfb5a474284f)

how much was there total?

<https://preview.redd.it/vnne2y34pvt71.png?width=1530&format;=png&auto;=webp&s;=58ae51a2817708eb22803704f45af8fb901007e0>

that much. crime af. I probably get fucked for showing that repeatedly but w/e. This is for the real deal whistleblowers. That whole thing has been mentioned many times over.

Well, they have been in my mind since i did that L bond video like 4 months ago. I did the Sears Tweet DD 2 months ago where i decided to refresh everyone's memories about this laundering scheme.

Since other subreddits are blasphemy here's the tweet about the tweet :

<https://twitter.com/itsalwaysrains/status/1449512442241847296?s=20>

PLEASE LOOK AT LE. WHICH IS LIFE EXPECTANCY.

[LONG LIVE THE OLD PEOPLE!!](<https://preview.redd.it/a2uxp4hipvt71.png?width=972&format;=png&auto;=webp&s;=31c02d5f5039d98c41837916a6b8aca2ae02c048>)

does that honestly say 172 Months (edited-> ~~years)~~ life expectancy? Oh you mean the ratings for the life bonds were manipulated just like the MBS or the internet agency ratings from Morgan Stanley for the 2001 .com bubbles?

Well what do you mean ASBT? Why would you say that?

<https://preview.redd.it/v8r91mhx10u71.png?width=1894&format;=png&auto;=webp&s;=b01bf846091c432aa0c1986ff98faae59cf665b3>

Because majority of the insurance companies mentioned (filing is from 2012 but VERY valid as this continued until these L bonds were suspended this year for fraudulent shit) are rated A- or better. Also to note in this filing that it states : "Figure includes an adjustment to increase, by 7%, any life expectancy provided by 21st Services.." That's neat.

Information on using these death bonds as equity can be found here. <https://thismatter.com/money/bonds/types/death-bonds.htm>criminal. Literally. One of those Litigations can be found here:

1. [https://www.sec.gov/Archives/edgar/data/1522690/000121390018003608/f10k2017ex99-2_gwgholding.htm](https://www.sec.gov/Archives/edgar/data/1522690/000121390018003608/f10k2017ex99-2_gwgholding.htm)

So I digress. That's why I've been into IFP Advisors. About those 13F entries..

Active Lehman positions... Not sure about these... Hmm. Wait. Didn't Barclays consume the American division with a 20% stake that they bought for \$1? That's rhetorical. Yes. They did. Nomura Holdings also bought a 20% stake into Lehman and earned the rights to all other Lehman divisions outside of America.

2003 Bank of America calls...!

2004 Bank of America calls...!

What. THE FUCK!!! Let me tell you. These made me really go into this little brain of mine. I had to physically PUT wrinkles there. I think that <https://www.sec.gov/rules/sro/dtc/2021/34-92249.pdf> is the filing that changed the rule about an underlying's owners name HAS to match the derivatives name. Aka no more loaning shares. Aka divorced puts/calls must be assigned to the owner of these graveyard zombies.

It's literally why we saw the rise in SEARS , that I mentioned in my [breakdown of the tweet](<https://twitter.com/itsalwaysrains/status/1449512442241847296?s=20>) and to show that there was a zombie frog. Literally bringing up IFP Advisors as having the ZOMBIE STONKS in their 13' s. Which seems to be a VERY common occurrence with IFP Advisors. Now some stupid charts to use as reference for price growth from 03-04 for Bank of America.

<https://preview.redd.it/pw16i271szt71.png?width=883&format;=png&auto;=webp&s;=620c99255cbd18b45a83a492085e4737d5963d41>

Above is Bank of America 10y chart from 1994-2004

<https://preview.redd.it/fimm0vo9szt71.png?width=900&format;=png&auto;=webp&s;=64f712bc3922a04bf969cfb5e03afbf9400e5a14>

THIS chart focus's on just 2003 - 2004.

So that one though. This is the most important. I pondered on these for over a week. Showed everyone possible in discord and no-one seemed to have a good reason for these. I was REALLY hoping anyone would have any idea about how or why these calls would appear.. Here's what I'm thinking.

****I have a theory about HOW the .com bubble was literally created using dark pools and high freq. trading with calls, INSTEAD OF PUTS, to increase the price and using the mathematics of the law of mean reversion, CRASHING TF out of the stock price and then pairing that momentum with shorts for underlying's that they didn't want to survive, never having to cover for the calls or the puts that were not assigned/executed.****

[It'll be okay retawd. It'll be okay.](<https://i.redd.it/2wv0rwtzmzt71.gif>)

Why would anyone want to do that, you might ask?

BUY LOW = underwrite the IPO.

CREATE MOMENTUM = [Listen to Cardboard Cramer talk about this.](<https://youtu.be/gyaPf6qXL88>)

FOMO reactions.

Sell high = PUMP, DUMP, ???, PROFIT!!

BUY MORE = Shorts come into play here. Profit up, Profit down. MORE SHORTS! THEN MORE SHORTS!

Shorts = Use FUD in the MSM to create negative momentum to destroy conviction and create false narrative.

Then crash that shit to death and allow your friend's to purchase the company, whether SHLDQ, BBY,

BBBY, Kmart, Circuit City, Toys R us, RadioShack, etoys.com, goto.com, blockbuster, Hollywood video, comcast, AT&T.; I think it should be easy to see this does in fact show a pattern.

The pattern of vulture capitalism 101, mixed with my cousin tommy playin with derivatives to manipulate the price, and retail to inject cash into a manipulated and controlled underlying asset, then convince them to sell.

Oh wait. Did I bring up stocks? Here's a chart.

<https://preview.redd.it/jlbto7avzt71.png?width=1182&format;=png&auto;=webp&s;=9a201ccd1d1c988e481cf3f5a5f43e9dcf1a3af5>

This chart shows:

Bank of America in black , rising from 1994-1998. (Monica Lewinsky ■)

Nokia and the 2000 bubbling

BlackBerry 2008 bubble

BBBY was drunk in 2014-2015.

When going over Laser Haas's past posts I noticed a pattern that most of these stocks had a HUGE RISE in their values before crashing to shit. Made me REALLY think about those 03 04 BOFA calls. When looking at the chart, it would appear that the underlying was at ****HALF OF THOSE CALLS VALUE****. So the theory had to be able to solve WHY they would have been divorced calls from 2003 on a current 13f and why it would be just "floating around in the paperwork" just to be assigned this year after the rule change..

<https://preview.redd.it/h0i8qnksnzt71.png?width=1296&format;=png&auto;=webp&s;=ba04d881de06911dd51c20b18834723ed50f7a0a>

How could I come to this retarded collusionary conclusion? Autism. ■■■■If you refer to [this tweet here](https://twitter.com/itsalwaysrains/status/1449493050716155909?s=20) , it refers to a previous post of mine to show EXTREMELY high financials trying to understand the mechanics of the mathematics of the underlying MCD, which had a Frivolously Related Output Gap when compared to its financials and its trading volume. I couldn't find any good explanation so I started to do honest DUE DILIGENCE into this stock and company. what a rabbit hole.

Aka if I borrow your reddit card, that shit now says always sad but truthful, instead of your almost as cool name.

It is my thesis that the calls and strange positions are showing up on current 13F's because the owner of the derivative had to be assigned according to the rule change. That would also show me that if the underlying CUSIP still exists then that would explain the stock prices found in the frog icecream(McDonalds) writeup I referenced.

Or like these Puts/Calls on CHWY. Heh. WUTDOING simplex?

<https://preview.redd.it/hxf1gjc41wt71.png?width=1829&format;=png&auto;=webp&s;=3e836e7e0cbb1af87be47c86cd0b01a6fb644925>

I literally think they were using dark pool trading + hi frequency fuckery + doing that ONE trade on exchange to get that call assigned at a huge price to not interfere with underlying value. IN 2001. Which would explain those fucking calls and the chart from OSTK which had an EXTREMELY SUS amount of FTD's and was on the watch list for like 800 days. Ask Patrick Byrne about it over at www.deepcapture.com , :) , shoutout to that guy. Fuckin patriot.

This is a mechanic that many have said I am retarded for thinking of. So I am bringing it to you guys. I truly think that Bain n co , which I have learned a lot about from the writings of /u/Laser_Haas_eToys , **were a key player with Morgan Stanley.**Here is a simple flow of crime involving Morgan Stanley and a few

other individuals..
This is beautiful.

This is art.

And sadly it all ties into the company that is winning in this chart :

Damn. If you got in the IPO of amazon then you fuckin KILLED it if you had diamond hands. Wonder who the underwriters were?
Well it says right here in the snip from their IPO.

Deutsche Morgan Grenfell
Alex. Brown & Sons Inc
Hembrecht & Quist LLC.

Interestingly enough Deutsche bank absorbed Alex. Brown & Sons Inc and Hembrecht & Quist LLC. They also acquired Bankers Trust in 1999, which was Bezos first job from 86-88, when he left to join D.E Shaw as an algorithmic programmer..

<http://news.bbc.co.uk/2/hi/business/361454.stm> states after merging with Bankers Trust, it was renamed to Deutsche Asset Management.

Interesting facts right?

[/u/tophereth/](<https://www.reddit.com/user/tophereth/>) & /u/avidtreesfan wrote a lot about that company. writeup is here: [https://www.reddit.com/r/Superstonk/comments/pgttob/the_post_about_gamestop_being_a_victim_of_jeff/](https://www.reddit.com/r/Superstonk/comments/pgttob/the_post_about_gamestop_being_a_victim_of_jeff/)Why bring up Deutsche?

The dumbass thing is .txt, have to save it as HTML and then open it for it to not have that garbo-code.

More to come. Out of time at my location.

This will be followed by a PART 2, Connecting IFP to Scion Asset Management transportation sector picks. I will show you how to understand key #1. Economics.

Until then, have some real life footage of me dealing with shills:

Have some fuckin fun and keep diggin.

I'm still trying to figure out WHY these calls didn't hit EXPIRY.

KNOWLEDGE is POWER.
POWER TO THE PLAYERS.
