I think they're going to make this their exit. Get retail to buy their short contracts through ETFs like TLSQ.

It seems like incredibly poor timing politically for the SEC to approve shorting meme stocks. That they just did it and without fanfare is suspicious.

I bet the MSM is going to push the narrative to MAGA-nation. "Take action against the idiots ruining the stock market! Buy this short ETF because their time is SHORT!"

GME Uranuses and it's retail holding the bag.
