Long time lurker, minimal contributions until lately as I've been trying to get enough sparkle dust to post to the other GME sub and post these thoughts there. I read 1.5-3 hrs of info daily on this saga and love trying to connect dots that many of the great apes post. Unless you're reading and taking notes many details and possible links are likely lost that have other lives to worry about. I should've posted months ago but my poor eyesight on my little phone can handle only so much late at night. I knew I needed to type on my computer or I'd end up quitting half way through. Enough of the sales pitch, here's what I've expected and we are likely seeing:

My 741 theory (since it's just 2 sleeps away!) -> You're 1 registered share will now become 7 (or 8?) 1 Original + 3 Dividend shares + 3 or 4 NFT dividends (1 for each share = 4 OR 1 for each dividend share = 3). Possibly all received on Friday as they would've had to inform the SEC by July 11th. "Whoops" RC forgot that part when announcing the 4-1 split.

Loopring has always been an important part of this plan and IS THE BACKBONE of the new marketplace. Acquisition of this company and the platform would seem highly important. Without low NFT transfers you cannot trade NFTs worth a few dollars as you would find in many video games and is a vital advantage over OpenSea and other markets. The LRC subs have many wondering why is it so quiet on updates, marketing, improvements or even the next Loophead drop. Maybe they're just busy rebuilding the financial markets, arranging teams and have enough to do without showing their hand to those trying to squirm out of trouble (oh and good lawyers executing NDAs)

Loopring also holds a patent for a financial marketplace to issue & trade shares. I feel I haven't read enough into this but I know a patent specifically for that should hold some weight and would allow GME to move some or all of their value (GMERICA) to a new marketplace if they needed to.

Gamestop, or GMERICA will have all the publicity in the world when a few (165,000+) apes suddenly are worth millions and retail investors will ask HOW? and WHY? and how do you prove it will not happen again? Wall Street is simultaneously going to lose a lot of (ALL) trust and the companies listed will be desperate to prove that this fuckery isn't happening to their stock holders as well.

GME first, then BBY, Tsla, PopKernel, Apl... how many of these other companies are fighting this battle or have connections with RC and would love to prove they are who they say they are? I hope/expect NFT dividend(s) and the acquisition of Loopring. With a billy in the bank and basically blank checks to offer there is no reason not to expect their teams, products and plan to be tied together and secure.

All of this will be world changing. The working class and everyone that has earned a paycheck has been f'ed generation after generation with WS slowly draining money from our blood and sweat. It needs to come to an end and this is the start.

Not to add my own rubbish but I've always said "We work to live, not live to work" and that technology should make our lives easier and provide us more time to live. Yet it's the opposite for 99% - there is a reason for that and it's the corporate greed we're fighting. Never forget that time is the most valuable asset in the universe.

Thanks for reading, I know I have a lot more to spew but I'm going home to my family. I needed to post this as I can feel the end near and I truly hope everyone that comes out on top of this helps prop up those that are knocked down and deserve it. BUT NOT YOU K.GRIFFIN, rot in jail for the misery you've caused so many others you THEIVING FINANCIAL TERRORIST. Buy\HODL\DRS!

Edit: forgot a word
