[As per the Chair...](<https://twitter.com/ryancohen/status/1508283974770118659>) His wording sounds like a man enjoying his precipice of victory. It sounds like he has ensured victory, and is now waiting for everyone involved to realize it. Maybe you're asking how?

Any action/news benefiting GME+INVESTORS would force upward movement by pulling 'real shares' from the Dark-Pools. Any Stock purchases by GME or Insiders would route through Lit-Exchanges. Think of ETFs that have to stabilize. Think of Institutional Ownership or Beneficial Holders who supply the Dark-Pools and work against GME+Investors. Now, think of the Options that are STILL settling and those [upcoming for execution/settlement](<https://gme.crazyawesomecompany.com/>).

What if the NFT Platform is done? This would mean that Gamestop would overnight become undervalued (speculation) by over \$10,000,000,000 USD. (Current perception being the company is undervalued at the listed Market Cap: \$11.6bn.)

What if Cohen is purchasing the rest of his 19.9% of Common Stock/[Shares](<https://i.imgur.com/0QfHKSo.png>)? [(Full document in this SEC Filing.)(<https://www.sec.gov/Archives/edgar/data/1326380/000132638021000006/a101-gamestopxsettlementag.htm>) This being routed through ComputerShare or Lit-Pools would cause a domino effect. Any more than 19.9% according to the agreement would require board approval.

What if Gamestop is activating their [\$101,300,000 USD](<https://gamestop.gcs-web.com/node/19651/html>) fund set aside for repurchasing of Stock/Shares from Cede & Co.? (Above linked 10-K including language FROM Gamestop referencing Short Squeezes.) (Additional documents on Gamestop's Investor Page report that they would have to let Computershare know ahead of time, and infer that they should notify Investors proximally.)

To close out this post... What do we say to those that owe us money?

****FUCK YOU, PAY ME**.**

[(MO ASS was not allowed in the title or post according to Subreddit Prompt.)(<https://i.imgur.com/92eO8ls.png>)
